I want to be your City Council representative.

Great neighborhoods are the building blocks of great cities.

Our community has great neighborhoods, but they are vulnerable to change. As your representative at City Hall, I will work for development that enhances our established community. Working together we can keep District 9 a great place to live.

Here is what I plan to do as your representative:

Public Safety – The Dallas Police Department has done an excellent job of providing visible, interactive protection downtown and at special events. I want to see some of those same techniques applied to areas of our community that are experiencing increased crime.

Parks – The parks in our part of town need the same attention and care that we give to White Rock Lake. I want to work with you to make the community parks assets for our children and neighborhoods. Let's also work together to ensure healthy air in Dallas and cleaner water in White Rock Lake.

Protect Jobs – Good jobs and economic viability are key to a neighborhood's quality of life. I will work to make sure job opportunities continue to expand.

I am committed to serving your interests. I pledge to spend your tax dollars wisely. I will listen to your concerns and cast votes based on merit, not politics. I need your help and your vote.
